Degrees

PhD, Cognitive and Neural Systems, Boston University, 2005, Prof. Frank Guenther
B.S. (Honors), Computer Science, National University of Singapore, 1997, Prof. Lonce L. Wyse

Employment

Principal Research Scientist, McGovern Institute for Brain Research, MIT, 2015 – Current
Assistant Professor, Department of Otolaryngology, Harvard Medical School, 2014 – Current
Research Scientist, McGovern Institute for Brain Research, MIT, 2011 – 2014
Research Scientist, Research Laboratory of Electronics, MIT, 2007 – 2011
Postdoctoral Associate, Research Laboratory of Electronics, MIT, 2004 – 2007, Dr. Joseph S. Perkell
Software Engineer, Kent Ridge Digital Labs, Singapore, 1997-1998

External Positions held

Massachusetts Eye and Ear, Harvard Medical School, 2014 – Current, Research Associate
Speech and Hearing Biosciences and Technology, (now in) Division of Medical Sciences, Harvard Medical School, 2008 – Current, Member of the Faculty
Standards for Datasharing Taskforce, International Neuroinformatics Coordinating Facilities, 2010 – 2016
Executive board, TankThink Labs, LLC, 2011 – 2015
Department of Cognitive and Neural Systems, Boston University, 2005-2010, Research Fellow

Honors

Phase I winner for the Open Science Prize competition, NIH, HHMI, Wellcome Trust, 2016
Educational stipend, International Society for Magnetic Resonance in Medicine, 2008
Graduate Teaching Fellow Award, Boston University, 2000
Presidential University Graduate Fellowship, Boston University, 1998

UROP Students supervised

Alkhairy, Samiya, Fall, 2009, Spring 2010
Zhang, Mark, Spring 2012
Ung, William, Spring 2012
Smith, Ashley, Spring 2015
Biswas, Jyotishka, Spring 2016
Suh, Michelle, Spring 2016
Taylor, Tilly, Spring 2016
Jackson, Blake, Spring 2016
Batmunkh, Zulsar, Spring 2016
Wu, David, Fall 2016
Wu, Kathy, Spring 2017

Ph.D. Students Supervised

Sitek, Kevin, in progress (NIDCD/NIH NRSA F31 fellowship)
Ciccarelli, Gregory, 2017

Teaching experience

6.541/SHBT.204, Speech Communication, Spring 2009, 2011- 2016
6.551/SHBT.200, Acoustics of Speech and Hearing, Fall 2007- 2015
HST.714/SHBT.200, Acoustics, Production, Perception of Speech, Fall 2016 -

Service

Internal service:

Admissions committee, Speech and Hearing Biosciences and Technology Program (HST), 2010 – Current
Curriculum committee, Speech and Hearing Biosciences and Technology Program (HST), 2009 – Current

External service:

Associate Editor — Frontiers in Brain Imaging Methods, 2012 – Current
Frontiers in Neuroinformatics, 2016 – Current
Frontiers in Human Neuroscience, 2015 – 2017

Ad hoc grant reviewer
National Science Foundation, 2008, 2010, 2013
National Medical Research Council, Singapore, 2007, 2009, 2011-2012
Department of Defense, 2011
Israel Science Foundation, 2015

Ad hoc editorial reviewer
Biological Psychiatry, Brain, Brain and Language, Cerebral Cortex, Current Biology, European Journal of Neuroscience, Frontiers in Computational Neuroscience, Frontiers in Systems Neuroscience, Frontiers in Neuroinformatics, Human Brain Mapping, Journal of the Acoustical Society of America, Journal of Neuroscience, Journal of Speech, Language and Hearing Research, Magnetic Resonance in Medicine, Nature Methods, NeuroImage

Editorial board, Special Research Topic, Python in Neuroscience, Frontiers in Neuroscience
Nipype teaching workshops, Edinburgh 2011, Magdeburg 2012, Boston 2017
Speaker, Educational workshop, Organization for Human Brain Mapping, Seattle, 2013
Organizer, HBM Hackathon, Organization for Human Brain Mapping, Seattle, 2013
Local organizing committee, 4th Biennial Conference on Resting State Connectivity, Boston, 2014

Technological and Other Scientific Innovations

MIT VoiceUp: A mobile platform for tracking health related information	https://github.com/satra/MIT-VoiceUp-App I directed the development of this platform and associated applications available from the Google Play Store and Apple Itunes Store. These are intended to allow researchers to collect longitudinal survey data from questionnaires, active tasks such as speaking and walking. It also allows participants to access their own data through a personal data store. It was supported by a collaboration between the McGovern Institute for Brain Research and MIT Lincoln Laboratory.
Nipype: Brain	Gorgolewski K, Burns CD, Madison C, Clark D, Halchenko YO, Waskom ML,

imaging analysis framework 2008-	Ghosh SS. (2011). Nipype: a flexible, lightweight and extensible neuroimaging data processing framework in Python. Front. Neuroimform. 5:13. https://github.com/nipy/nipype Nipype provides an environment that encourages interactive exploration of algorithms from different packages (e.g., SPM, FSL, FreeSurfer, Camino, MRtrix, AFNI, Slicer), eases the design of workflows within and between packages, and reduces the learning curve necessary to use different packages. I initiated the development through an NIH R03 as PI, maintaining it as an opensource collaborative project, and now supporting the development through an NIH R01 as PI.
MURFI: a realtime MR biofeedback software 2007-	Hinds, O., Ghosh, S., Thompson, T.W., Yoo, J.J., Whitfield-Gabrieli, S., Triantafyllou, C., Gabrieli, J.D. (2011) Computing moment-to-moment BOLD activation for real-time neurofeedback. Neuroimage. 54(1):361-8. PMID: 20682350. https://github.com/gablab/murfi2/ This opensource software framework allows biofeedback of activation based on the BOLD signal. I created the testing and validation framework for the software and contributed to its design and implementation. We are now using this software for ongoing projects in the treatment of schizophrenia and in the development of new paradigms. Development of this was supported by the MIT MINT program.
Audapter: A realtime vocal modification software 2005 - 2010	Cai, S., **Ghosh, S.**, Guenther, F., Perkell, J. (2011). Focal manipulations of formant trajectories reveal a role of auditory feedback in the online control of both within-syllable and between-syllable speech timing. J Neurosci 31: 45. 16483-16490. PMID: 22072698. https://github.com/shanqing-cai/audapter_matlab https://github.com/shanqing-cai/audapter_mex This opensource framework allows modifying vocal characteristics in realtime. I established the initial framework and guided Marc Boucek and Shanqing Cai in extending the framework to perform new paradigms.
Noise suppression for MRI patient microphone input 2004-2005	Two provisional patents were applied for but not pursued after expiry. 2007 Online noise suppression software for Magnetic Resonance Imaging 2007 Bidirectional noise suppressing communication setup for Magnetic Resonance Imaging https://arxiv.org/abs/1207.5827 The goal of this software was to provide a mechanism to suppress MR noise. This is still being used in research projects at MIT.
Carotid artery diameter estimation from ultrasound images	Current usage status is unknown. I built the graphical interface for the software to provide a semi-automated method for artery diameter estimation that reduced human intervention significantly and validated it against manual measurements.

1999-2000

FlexEffex: Interactive sound effects and music 1997-1998	I contributed to the development of the FlexEffex architecture and rewrote the internal sound effects plugin api and hardware libraries. The software was subsequently sold to a company, MindMaker Inc.

O'Connor D, Potler N, Kovacs M, Xu T, Ai L, Pellman J, Vanderwal T, Parra L, Cohen S, **Ghosh S**, Escalera J, Grant-Villegas N, Osman Y, Bui A, Craddock C, Milham M (2017) The healthy brain network serial scanning initiative: a resource for evaluating inter-individual differences and their reliabilities across scan conditions and sessions. Giga Science.
58. **Ghosh SS**, Poline JB, Keator DB et al. A very simple, re-executable neuroimaging publication [version 2; referees: 2 approved with reservations]. F1000Research 2017, 6:124 (doi: 10.12688/f1000research.10783.2)

Presentations

The emerging informatics revolution in neuroscience
Boston Children's Hospital, Boston, USA, 2017

Variance is the spice of reproducible research
Annual Neuroinformatics Congress, Kuala Lampur, Malaysia, 2017

Applications of Machine Learning to Brain Imaging and Psychiatry
Computational Psychiatry Workshop, Satellite of Biological Psychiatry, San Diego, USA, 2017

Predicting Treatment Outcome in Social Anxiety Disorder and Tracking Major Depression and Parkinson State Using Behavioral Information
ACNP 55th Annual Meeting, Florida, USA, 2016

Standardized Provenance for Reproducible Dataflows in Neuroscience
Japan Neuroscience Society, Yokohama, Japan, 2016

Speaking one's mind: Vocal biomarkers of depression and Parkinson disease
Acoustical Society of America, Salt Lake City, USA, 2016

Predicting Treatment Outcome in Anxiety and Depression
McLean Hospital, Belmont, USA, 2015
Organization for Human Brain Mapping, Hawaii, USA, 2015

Linking Knowledge and Reproducible Research Via Standardized Provenance Models
Workshop at the Bernstein Computational Neuroscience conference, Heidelberg, Germany, 2015
Tools for Integrating and Planning Research in Neuroscience, UCLA, Los Angeles, USA, 2014

A Neuroinformatics Bridge to Personalized Healthcare
Boston University, Hearing research seminar, Boston, USA, 2014
Vanderbilt University, Nashville, USA, 2014

Enabling knowledge generation and reproducible research by embedding provenance models in metadata stores
Neuroinformatics Congress, Stochkholm, Sweden, 2013

Python Tools for Reproducible Research in Brain Imaging
PyData conference, Boston, USA, 2013

Nipype: Opensource platform for unified and replicable interaction with existing neuroimaging tools
Brigham and Womens Hospital, Boston, USA, 2009
Massachusetts General Hospital, Boston, USA, 2010, 2012, 2013
Radiology, U of Washington, Seattle, USA, 2011,
PICSL, U of Pennsylvania, Philadelphia, USA, 2011
Scientific Python Conference in India, Hyderabad, India, 2010
INCF Datasharing Workshop, Quebec, Canada, 2011
Python in Neuroscience Workshop, Paris, France, 2011

Leveraging scientific computation to bridge neuroimaging and clinical applications
Radiology, U of Pennsylvania, Philadelphia, USA, 2011
Haskins Laboratories, New Haven, Connecticut, USA 2012

Datasharing and reproducible research: Barriers and solutions
Janelia Farm Bioimage Informatics II Conference, Washington DC, USA, 2011
University de Montreal, Montreal, Canada, 2013

Using high-resolution fMRI to identify individual-specific speech motor regions
Surgical Brain-Mapping laboratory, Brigham and Womens Hospital, Boston, USA, 2010

Region of interest analysis of functional Magnetic Resonance Imaging data
New York State Psychiatric Institute, Columbia University, New York, USA, 2007
Singapore General Hospital, Singapore, Singapore, 2007

Exploring speech motor control through computational modeling and neuroimaging
Center for Life Sciences, National University of Singapore, Singapore, 2007

Research contracts and grants

Current

2016 – 2019 Nipype: Dataflows for Reproducible Biomedical Research
NIH/NIBIB/R01 EB020740
PI

2016 – 2021 ReproNim: Center for Reproducible Neuroimaging Computation
NIH/NIBIB/P41 EB019936 (PI: David Kennedy, UMass Medical School)

Director: Technology, Research and Development Project 2
Member of administrative and training cores
Site PI

2016 – 2021 NeuroScout: A cloud-based platform for rapid re-analysis of naturalistic fMRI datasets
NIH/NIMH/R01 MH109682 (PI: Tal Yarkoni, UTexas, Austin)
Site PI

2015 – 2019 Connectomes related to anxiety and depression in adolescents.
NIH/NIMH/U01 MH108168 (PI: Susan Whitfield-Gabrieli, John Gabrieli, MIT)
Informatics Lead

2012 – 2017 A randomized controlled trial of intranasal oxytocin as an adjunct to behavioral therapy for autism spectrum disorder (PI: John Gabrieli, MGH)
DOD/Clinical Trial Award AR110329
Site PI

2012 – 2017 Blast Induced Traumatic Brain Injury
DOD/Institute for Soldier Nanotechnologies
Investigator

2014 – 2017 Brain basis for voice-based tracking of neurological disorders
MIT McGovern Institute Neurotechnology Program
MIT Lincoln Lab Funds
Co-PI

Past

2008-2010 Dissemination of cross-platform software for artifact detection and region of interest analysis of fMRI data
NIH/NIBIB/R03 EB008673
Co-PI

2012 - 2014 Learned regulation of the limbic network via combined EEG and fMRI (PI: John Gabrieli)
NIH/NIMH/R21 MH092564
Investigator

2012 – 2015 MURFI: An Optimized Platform for Realtime fMRI Neurofeedback
MIT McGovern Institute Neurotechnology Program
Co-PI

2011 – 2016 Using Real-Time Functional Brain Imaging and Computer Training To Enhance Recovery from Traumatic Brain Injury (TBI) (PI: John Gabrieli)
DOD/Clinical trial award PT100120
Investigator

2015 – 2017 Genetic Determinants of Schizophrenia Intermediate Phenotypes
NIH/NIMH/R01 (Supplement) MH092380 (PI: Tracey Petryshen, MGH)
Site PI
